

## Health and Safety and Risk Management Policy

AQ Inductives Hungary Kft develops, manufactures and assembles inductive components and systems for demanding industrial customers. With our commitment to Total Quality our customers become long-term partners.

We are committed to maintain and continually improve Business, Quality, Environmental and Health&Safety management system fulfilling all applicable health and safety requirements, regulations and laws and to the applicable railway safety regulations & laws, industry standards, laws and guidelines.

We commit to continuously improve the working environmental, eliminate accidents and reduce risks to the benefit of all our employees, customers and other parties involved. We will review our corresponding processes and system periodically.

We commit to develop, manufacture and transport products in such a way that there is minimal risk of injury to workers, users, passengers, other parties involved and to the public in general.

AQ Inductives Hungary Kft minimizes the potential business risk, the impact on health and safety, on accident and continuously improves safety performance levels by:

- | Identifying and evaluating the potential risks on humans (all parties involved and the public in general), on business, marketing & sales, finance, facility and equipment, the risks are but not limited to resources, products, processes, machines and facilities.
- | Defining the contingency and emergency plan and putting into place the controls and resources to prevent accidents and reduce the risks and impact of them.
- | Providing regular trainings to all employees, third parties and temporary employees to work in compliance with the relevant safety procedures and standards
- | Auditing and up-dating this Safety Policy and audit all persons responsible and in charge of implementing and be compliance with the Safety Policy and the Rail Safety Management Plan
