

CUSTOM-BUILT, RELIABLE DRY-TYPE TRANSFORMERS

With nearly 40 years of experience, AQ Transformer Solutions (AQTS) is the leading supplier of custom-built, dry-type transformers. Our background in specialty design laid the foundation for a solid engineering-based company specializing in transformer and reactor solutions for various industrial and commercial applications. With this extensive knowledge and experience, We are an industry leader in providing reliable, efficient and cost-effective solutions on-time, every time.

Magne-Seal Dry-type Transformer

AQ Transformer Solutions is the industry leading manufacturer of standard and custom dry-type transformers made in the USA.

VPI Dry-Type Transformer

SHAPING ELECTRICAL POWER

We deliver superior quality solutions for long-term efficiency and superior reliability.

AQ Transformer Solutions

WE ARE RELIABLE

Strong technical expertise and vast application experience allows us to design the best solutions for demanding applications where quality, efficiency, and reliability are required. Meeting the customers' requirements is accomplished by creating a comprehensive analysis of all the transformer's features. Our engineers will develop the best transformer for the application to provide a premium product ensuring a defect free performance and on-time delivery to every customer every time.

DRY TYPE TRANSFORMER INDOOR & OUTDOOR

VPI (Vacuum Pressure Impregnated)
Up to 12 MVA, 35kV
220°C Class Insulation

Magne-Seal (Encapsulated)
Up to 12 MVA, 35kV
220°C Class Insulation

APPLICATIONS

- Rail Transit - Wayside Power, Rolling Stock
- Marine - Military, Industrial
- Utility - Fossil, Hydro, Nuclear
- Rectifier - Motor Drives, Generator Exciter
- Repair/Rewind - Factory, On-site
- Mining - Metals, Coal
- Renewable Energy - Solar, Wind
- C&I - Data Centers, Steel, Paper Mills, etc.
- Oil & Gas - Refineries, Pipelines, Storage, etc.
